

Provisional Patent # 62/347,838

TPorter® Compartments:

1 TEEZyme® Sponge and 2 Red tie-bands

Sponge to perform bedside cleaning
Red ties to indicate soiled probe inside TPorter

2 PullUp™ Bio-Barrier Sleeve

To be placed on TEE shaft after bedside cleaning has been performed—indication of potential biohazard

3 Bite block(s) or other items necessary for procedure

Compartment is designed for healthcare specific needs

4 Electrical connector holder

Placement of the electrical connector for secure transport

5 Cable between electrical connector and handle

Placement of the flexible cable that connects the electrical connector to the handle of the TEE probe

6 TEE Steering mechanism/handle

Designed to hold the steering mechanism/handle and feeds directly into compartment # 7 where the shaft is placed

7 Channel for the TEE Probe shaft

Designed to hold TEE Probe shaft with the correctly designated PullUp per IFU

8 Attachment points to secure TPorter lid and case with tie-band

Indicator tie-band that visually identifies the status of the TEE probe inside

Letter "A" Attachment point for TPorter lid closure

Creedmoor, NC 27522 USA
